Life can be hard to navigate, whether living with autism or someone who loves them, that’s why we offer two programs for adults that provide **community support** and guidance for the journey.

**Brilliant Breakfast Club**

Our older students are invited to grab their favorite tea or coffee beverage and hang out with us on Friday mornings! These weekly live video chats are tailored for young adults 18+ interested in an online social experience and peer discussion designed to foster pathways toward independence. Discussion will touch on daily living skills including health and nutrition, finances, job searches, community engagement, and more. Facilitated by special education professionals and interns, participants have the opportunity to meet up virtually with their peers and grow together by building a community of mutual support.

Parents and caregivers are invited to join this weekly one-hour moderated video chat session that provides connection, conversation, and community support in a safe, respectful environment. Our goal is to have parents take comfort in hearing from others facing similar challenges. It’s wonderful to know you’re not on an island by yourself. Discussion topics vary weekly.
